Rohan Katkam

AI Full Stack Developer

katkamrohan1698@gmail.com — Open to Relocate — **LinkedIn** — **GitHub** — **Portfolio**

EDUCATION

M.S. in Computer Science — New Jersey Institute of Technology, Newark, NJ 2023 – 2025
B.Tech in Computer Science — St. Martin's Engineering College, Hyderabad, IN 2018 – 2022

TECHNICAL SKILLS

Front-End: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
Back-End & APIs: Node.js, Express.js, REST APIs, Python, Django, Flask, Java, C++, MERN/MEAN Stack
AI & Data: RAG, Machine Learning, MySQL, MongoDB, Firestore, HBase, Data Structures & Algorithms
Cloud/DevOps: AWS (EC2, S3), Docker, CI/CD, Microservices, Git, Agile/Scrum
Tools: GitHub, VS Code, Postman, MySQL Workbench, Unit Testing, Code Reviews

PROFESSIONAL EXPERIENCE

Full Stack Developer (Volunteer) — *BME (Bright Mind Enrichment)* Jun 2025 – Present

- Built responsive platform for community outreach using **React.js** and **Firestore** with real-time data handling.
- Established comprehensive code review processes and unit testing protocols using **Jest** and **React Testing Library**, achieving **85%** code coverage and ensuring production stability.
- Designed intuitive admin dashboards with data visualization components to track volunteer metrics, **enabling stakeholders** to make **data-driven** decisions on community outreach initiatives.

Full Stack Developer — *Bio187.com (Part of Nuboe.com)* Jan 2025 – May 2025

- Architected and implemented scalable **MERN stack** application following **software engineering best practices**, **comprehensive testing protocols**, and **code reviews**.
- Collaborated with product stakeholders to deliver **end-to-end solutions** from design through deployment with **100%** on-time delivery.
- Engineered **AI chatbot** integration using **DeepSeek 1B** model with custom UI components, ensuring robust performance and user engagement.
- Built **automated RFP** onboarding system with intuitive admin interface, reducing manual processing time by **40%** through efficient backend logic.

Full Stack Developer — *Allure MedSpa, Mumbai, IN* Dec 2017 – Apr 2018

- Developed reusable, user-friendly UI components using **Angular** with focus on scalability and maintainability, increasing engagement by **30%**.
- Implemented responsive **design patterns** and **cross-browser** compatibility solutions, improving user experience with **50%** faster load times.
- Built interactive dashboard features with real-time data visualization, enabling better user insights and decision-making capabilities.
- Refactored legacy codebase following clean code principles and established coding standards, enhancing maintainability.

PROJECTS

Portfolio Website

- Designed and developed an interactive personal portfolio showcasing **full-stack** and **AI projects** with 3D visuals using **Three.js** and **Framer Motion** for smooth animations and transitions.
- Integrated **Resend** API for email communication and contact form automation, enhancing user engagement.
- Built with **Next.js** for optimized performance, server-side rendering, and **SEO**-friendly structure.
- Deployed on **Vercel** with automated **CI/CD** pipelines for seamless updates and zero downtime.

Movie App

- Engineered a scalable movie browsing application using **React Router** and component composition patterns, increasing average user session time by **30%** through intuitive navigation and UI design
- Implemented automated **CI/CD** pipeline using **Netlify** and **GitHub Actions** with unit test integration, enabling zero-downtime deployments and rapid feature iteration.

Weather App

- Built production-ready weather forecast application consuming third-party **REST APIs** with error handling and retry logic, maintaining **99.9%** uptime and serving real-time data
- Designed interactive, responsive UI with multi-day forecast visualization and implemented intelligent client-side caching to reduce API calls by **60%**.

Keep Note App

- Created secure **authentication** and **CRUD** features using Express and React.
- Indexed key queries, reducing response latency to under **100ms**.
